

Request for Council Action

Originator Engineering	Item Xcel Energy Contract for Street Lights along Lyndale Avenue from 86th to 94th Street
Agenda Section Consent	Date 3/21/2016
Description	

Lyndale Avenue from 86th to 94th Street is scheduled for a PMP Overlay in 2016. The Street lights along this corridor have reached their life span and some have already been taken down due to their deteriorated condition.

The replacement of 28 street lights is proposed during the Overlay project. Xcel Energy will install and own the street lights. The city will pay for the leased installation at \$144,748.00 and the on-going monthly street light rate will be \$29.25. The monthly rate is similar to what we were paying for the existing lights being replaced. This light exchange and operating monthly cost has been budgeted in 2016.

The Excel Energy Agreement has been reviewed and approved by Legal and a copy of it is available in the Engineering Division for review if requested.

Prepared by: Shelly Pederson

Presented by: Shelly Pederson, if needed

Requested Action
